- Extra credit is turned in under Assignments > Extra Credit on MyCourses.
- Include how you would like to apply your extra credit in the assignment text box. If you don't specify how you would like to apply extra credit, I will apply it for you.
- Anyone found lying/cheating to receive extra points will be reported to Student Integrity.

Late Work Policy

- Late work is discouraged. The semester will continue to press on, and getting behind on assignments will make it challenging to keep up

with new coursework. The semester is participation-based, and missing work will not allow participation or feedback.

- There is a one-week grace period for late assignments and projects. I do not issue late grades. You will receive a zero if the work is not turned in within this grace period. This late policy will apply and is not negotiable.
- Reading assignments do not apply and must be completed by the beginning of the class period on the day they are listed on the syllabus.
- If Disability Accommodations apply to you, please discuss with me a plan for work submission so you don't fall behind. It is your responsibility to stay on top of deadlines outlined in the syllabus and in class and to meet with me and/or classmates to stay current on coursework.
- Be sure to be fully prepared and ready to work at the beginning of class, and set aside the correct amount of time outside of class to complete work. Expect to spend between 1 - 3 hours outside of class to complete course readings, assignments, and projects.

Assessment Tools

Each course element has an assignment sheet detailing the assignment, requirements, grading details, and turn-in procedures. Assignment sheets can be found in Assignments and Modules on MyCourses.

Course Changes

This course syllabus provides a general plan for this course. I reserve the right to make changes to the syllabus, including changes to assignments, projects, examinations, etc., in order to accommodate the needs of the class as a whole and fulfill the goals of the course.

Expectations

To be successful in this course, you should:

- Read the syllabus in its entirety.
- Attend class daily.

- Arrive on time.
- Be prepared (complete readings and assignments) to engage in class discussions.
- Stow your devices or set them to silent to minimize disruptions.
- Check [MyCourses](#) each day for announcements, content, discussions, assignments, tests, grades, and more.
- Respond to my emails (check [Claw Mail](#) daily) in a timely manner using appropriate language and grammar.
- Use my office hours or schedule appointments to discuss concerns.
- Familiarize yourself with the Student Honor Statement:
We will not lie, steal, or cheat, nor tolerate the actions of those who do.

To support your success, I will:

- Provide office hours or appointment options in the Faculty Information section of the syllabus.
- Respond to your emails in a timely manner (see the Faculty Information section of the syllabus).
- Provide feedback and grades in a timely manner.
- Assist you with locating and engaging with resources provided by the college. This syllabus includes some suggestions. Keep reading for details.

Academic Integrity

GGC students are expected to demonstrate integrity and honesty in their courses and to complete work according to my expectations. You are responsible for avoiding every aspect or appearance of academic dishonesty. While it is impossible to list all acts of academic dishonesty, examples are listed below. Additional details on academic integrity are found in the [GGC Academic Policy Manual, Academic Integrity Policy for Academic Dishonesty Matters \(Policy 4.1.1.1.2\)](#).

Academic Dishonesty. Examples of specific prohibited actions include, but are not limited to, the following:

1. Academic Misconduct: Performing, attempting to perform, or assisting another in performing any act of academic dishonesty.
2. Cheating: This act of dishonesty includes, but is not limited to, giving information to or taking information from other students during examinations. Cheating is also committed when students copy from unauthorized sources and/or represent some other person's work as their own. Collaboration on out-of-class assignments or examinations is considered cheating unless specifically stated. The use of Artificial Intelligence ("AI") on any assignment submitted for credit is generally prohibited. See my statement on Artificial Intelligence Use below.
3. Plagiarism: This category includes copying material from unpublished or published sources, including electronic resources, and submitting that material as the student's own work. Students are responsible for identifying the proper source and for giving credit to that source anytime that they present ideas that are not their own.
4. Unauthorized Use or Possession of Materials or Resources: Students must not use or possess unauthorized materials or resources in an academic activity.
5. Collusion: This act of dishonesty includes, but is not limited to, buying or selling material that can be misrepresented as a student's own work. In addition, students who fail to report known acts of academic dishonesty on the part of others may be held responsible for collusion.
6. Previously submitted material: Students may not submit work that has been or is being concurrently submitted, in whole or in part, in another class without first having received permission to do so from all the professors involved.
7. Misrepresentation or falsification of material: This act includes, but is not limited to, misrepresenting, fabricating, or altering academic material. In addition, students must not take an examination or test in the name of another student or present another student's work as their own.
8. Misrepresentation of circumstances: Students must not misrepresent personal circumstances (e.g., illness, conflicting responsibilities, etc.)

to avoid meeting academic responsibilities or to gain an academic advantage.

To avoid plagiarism, you must appropriately cite the sources of others' ideas, thoughts, and words that appear in your original work. In addition to requesting assistance from the [Academic Enhancement Center](#), me, or trusted peers, you may use a variety of technologies to improve your writing. These tools, which may include proofreading and editing features of word processing software, do not alter your work to an extent that fundamentally affects your claim to authorship.

I may use the Originality Check feature of Turnitin to see how similar your work is to online sources and to assist you in learning how to cite sources appropriately to avoid potential plagiarism. I may also use applications to detect writing generated by artificial intelligence (AI). Some writing tools use AI to suggest edits, while other AI technologies, such as ChatGPT, are meant to simulate human conversation and produce writing that appears to be authored by a person. Although AI can be used for educational purposes and to develop or improve one's writing, submitting work containing AI-generated text, unless I request or explicitly allow it as part of an assignment, is prohibited. **See my statement on Artificial Intelligence Use below.**

All violations of the Academic Integrity Policy shall be resolved via the Faculty Adjudication Process and/or the Formal Resolution (Student Conduct Board hearing through the Dean of Students Office) as outlined in the [Academic Integrity Policy for Academic Dishonesty Matters \(Policy 4.1.1.1.2\)](#).

Artificial Intelligence

All students should be familiar with the college's policy on [Acceptable Use of Artificial Intelligence \(AI\) for Academic and Administrative Purposes](#) and the [Academic Integrity Policy for Academic Dishonesty Matters](#).

For this course, my expectation regarding the use of Artificial Intelligence (AI) is as follows:

Attendance Policy and Absences

Attendance is a strong indicator of success in this class! Please plan to attend all class sessions and be on time. If you must be absent, please review the [college's attendance policy](#).

It is a best practice to inform me when you must be absent (see my preferred communication method) and discuss the option(s), if any, to make up missed assignments, tests, exams, etc. You do not have to share why you are absent with me directly. If you wish to provide documentation needed for the absence to be considered excused, you may [submit this to the Dean of Students](#), and they will work with you and me.

Complaints and Grade Appeals

If you have course-related issues, please schedule an appointment to meet with me. (See the Faculty Information above for contact details). If we are unable to resolve the issue you may contact the department chair. You may seek further assistance, if needed, through the Dean's office. The college also offers you the option to [file a written student complaint](#).
