Academic Integrity

GGC students are expected to demonstrate integrity and honesty in their courses and to complete work according to my expectations. You are responsible for avoiding every aspect or appearance of academic dishonesty. While it is impossible to list all acts of academic dishonesty, examples are listed below. Additional details on academic integrity are found in the [GGC Academic Policy Manual, Academic Integrity Policy for Academic Dishonesty Matters \(Policy 4.1.1.1.2\)](#).

Academic Dishonesty. Examples of specific prohibited actions include, but are not limited to, the following:

1. Academic Misconduct: Performing, attempting to perform, or assisting another in performing any act of academic dishonesty.
2. Cheating: This act of dishonesty includes, but is not limited to, giving information to or taking information from other students during examinations. Cheating is also committed when students copy from unauthorized sources and/or represent some other person's work as their own. Collaboration on out-of-class assignments or examinations is considered cheating unless specifically stated. The use of Artificial Intelligence ("AI") on any assignment submitted for credit is generally prohibited. See my statement on Artificial Intelligence Use below.
3. Plagiarism: This category includes copying material from unpublished or published sources, including electronic resources, and submitting that material as the student's own work. Students are responsible for identifying the proper source and for giving credit to that source anytime that they present ideas that are not their own.
4. Unauthorized Use or Possession of Materials or Resources: Students must not use or possess unauthorized materials or resources in an academic activity.
5. Collusion: This act of dishonesty includes, but is not limited to, buying or selling material that can be misrepresented as a student's own work. In addition, students who fail to report known acts of academic dishonesty on the part of others may be held responsible for collusion.
6. Previously submitted material: Students may not submit work that has been or is being concurrently submitted, in whole or in part, in another class without first having received permission to do so from all the professors involved.
7. Misrepresentation or falsification of material: This act includes, but is not limited to, misrepresenting, fabricating, or altering academic material. In addition, students must not take an examination or test in the name of another student or present another student's work as their own.
8. Misrepresentation of circumstances: Students must not misrepresent personal circumstances (e.g., illness, conflicting responsibilities, etc.)

to avoid meeting academic responsibilities or to gain an academic advantage.

To avoid plagiarism, you must appropriately cite the sources of others' ideas, thoughts, and words that appear in your original work. In addition to requesting assistance from the [Academic Enhancement Center](#), me, or trusted peers, you may use a variety of technologies to improve your writing. These tools, which may include proofreading and editing features of word processing software, do not alter your work to an extent that fundamentally affects your claim to authorship.

I may use the Originality Check feature of Turnitin to see how similar your work is to online sources and to assist you in learning how to cite sources appropriately to avoid potential plagiarism. I may also use applications to detect writing generated by artificial intelligence (AI). Some writing tools use AI to suggest edits, while other AI technologies, such as ChatGPT, are meant to simulate human conversation and produce writing that appears to be authored by a person. Although AI can be used for educational purposes and to develop or improve one's writing, submitting work containing AI-generated text, unless I request or explicitly allow it as part of an assignment, is prohibited. **See my statement on Artificial Intelligence Use below.**

All violations of the Academic Integrity Policy shall be resolved via the Faculty Adjudication Process and/or the Formal Resolution (Student Conduct Board hearing through the Dean of Students Office) as outlined in the [Academic Integrity Policy for Academic Dishonesty Matters \(Policy 4.1.1.1.2\)](#).

Artificial Intelligence

All students should be familiar with the college's policy on [Acceptable Use of Artificial Intelligence \(AI\) for Academic and Administrative Purposes](#) and the [Academic Integrity Policy for Academic Dishonesty Matters](#).

The use of AI to complete any assignment or exam is strictly prohibited. This includes the use of writing programs like Grammarly, as well as language translators. If you are unsure if a website or program uses AI you must contact me before submitting your assignment

The penalties for using AI are as follows

First Offense: a grade of F on the assignment/exam and loss of a letter grade for the course

Second Offense - a grade of F for the course.

I use multiple AI detectors and will only flag an assignment if there is a greater than 85% AI score from several of the detectors. If accused of using AI, a student can offer as evidence class notes or other supporting documents that I can use to justify that the detectors were incorrect.

Attendance Policy and Absences

Attendance is a strong indicator of success in this class! Please plan to attend all class sessions and be on time. If you must be absent, please review the [college's attendance policy](#).

It is a best practice to inform me when you must be absent (see my preferred communication method) and discuss the option(s), if any, to make up missed assignments, tests, exams, etc. You do not have to share why you are absent with me directly. If you wish to provide documentation needed for the absence to be considered excused, you may [submit this to the Dean of Students](#), and they will work with you and me.

Complaints and Grade Appeals

If you have course-related issues, please schedule an appointment to meet with me. (See the Faculty Information above for contact details). If we are unable to resolve the issue you may contact the department chair. You may seek further assistance, if needed, through the Dean's office. The college also offers you the option to [file a written student complaint](#).
